ANIMAL SERVICE CENTER OF THE MESILLA VALLEY
BOARD OF DIRECTORS

AGENDA

The following agenda will be considered at a regular Meeting of the Animal Service Center of the Mesilla Valley Board of Directors to be Held on **Thursday, January 10th, 2018 at 9am** at the City Council Chambers, City Hall, 700 N. Main St., Las Cruces, New Mexico.

I. Call to Order & Pledge of Allegiance

II. Roll Call of ASCMV Board Members and Determination of Quorum

III. Changes to Agenda and Approval of Agenda

IV. Minutes
   a. Approval of the Minutes from the regular ASCMV Board Meeting held December 13th, 2018.

V. Reports/Presentations
   a. City and County ACO Reports – City Animal Control and County Animal Control
   b. Shelter Statistics/Activities – Clint Thacker
   c. Committee Reports
      1. Finance – David Dollahon, Committee Chair
      2. Executive – Kasandra Gandara, Committee Chair
      3. Facilities – Greg Smith, Committee Chair
   d. Zero In 7 Update
   e. Best Friends Animal Society

VI. Public Input

VII. Chair and Board Comments

VIII. Adjournment

If You Need an Accommodation for a Disability to Enable You to Fully Participate in this Event Please Contact Us 48 Hours Before the Event at 382-0018/v or 541-2128/tty. Posted Dated: January 7, 2019. The agenda is on the web at: [www.ascmv.org](http://www.ascmv.org). Copies of the agenda packet are available at the Branigan Library, City Hall and the County Clerk’s Office.
ANIMAL SERVICE CENTER OF MESILLA VALLEY

December 7138, 2018 at 9:00 a.m.

BOARD MEMBERS PRESENT:
Kasandra Gandara - Chair
Jess C. Williams - Vice-Chair
Jack Eakman - Board Member (departed 9:05, returned 9:37)
Billy Garrett - Board Member
Ramon Gonzalez, Board Member
Gregory Z. Smith - Board Member
David Dollahon - Ex-Officio Member

I. Call to Order & Pledge of Allegiance (9:00 PM)
Gandara: Good morning and welcome to the Animal Services Center of Mesilla Valley Board of Directors meeting. It’s Thursday, December 13 at approximately 9:00 a.m. I call this meeting to order. Vice-Chair Williams will you please lead us in the Pledge of Allegiance.

ALL STAND FOR PLEDGE OF ALLEGIANCE.

Gandara: Thank you.

II. Roll Call of ASCMV Board Members and Determination of Quorum
Gandara: Will you please call the roll?

Baum: Board Member Dollahon.

Dollahon: Here.

Baum: Board Member Gonzalez.

Gonzalez: Here.

Baum: Board Member Eakman.

Eakman: Here.

Baum: Board Member Garrett.

Garrett: Here.

Baum: Board Member Smith.
Smith: Here.

Baum: Board Member Williams.

Williams: Here.

Baum: Chairperson Gandara.

Gandara: Here. We have a quorum. Thank you.

III. Changes to Agenda and Approval of Agenda

Gandara: Any changes to the agenda at this point? Okay, on to the approval of the agenda. Can I get a motion and a second?

Williams: Move approval.

Eakman: Second.

Gandara: All right. We have a motion to approve the agenda by Vice-Chair Williams and a second by Board Member Eakman. Okay, poll.

Baum: Board Member Gonzalez.

Gonzalez: Yes.

Baum: Board Member Eakman.

Eakman: Yes.

Baum: Board Member Garrett.

Garrett: Yes.

Baum: Board Member Smith.

Smith: Yes.

Baum: Board Member Williams.

Williams: Yes.

Baum: Chairperson Gandara.

Gandara: Yes.
Minutes

A. Approval of the Minutes from the regular ASCMV Board Meeting held November 8, 2018

Gandara: Okay, on to the minutes. May I get an approval?

Williams: Move approval.

Gandara: Okay.

Eakman: Second.

Gandara: Second. Same Vice-Chair Williams approved and second by Board Member Eakman.

Baum: Board Member Gonzalez.

Gonzalez: Yes.

Baum: Board Member Eakman.

Eakman: Yes.

Baum: Board Member Garrett.

Garrett: Yes.

Baum: Board Member Smith.

Smith: I'm abstaining because I was absent from that meeting.

Baum: Thank you. Board Member Williams.

Williams: Yes.

Baum: Chairperson Gandara.

Gandara: Yes.

IV. Reports/Presentations

A. City and County ACO Reports - City and County Animal Control
On to reports and presentations, City and County ACO reports and they're both here. Welcome. Good morning. Hello Miss Mary Lou. Good morning.

Good morning Chair and Councilmen and Commissioners. Let me find my report here real quick. Okay. Good morning. Mary Lou Ward Supervisor for Animal Control and Codes for Doña Ana County. And today I'm going to go ahead and start with our November JPA Report and I kind of did it in the same format as last time. I hope that's okay. I'll just start with our numbers of animals picked up. On this page right here we picked up 282 animals. I broke those down as to the owner-release animals, owner-release dogs, cats and then of course the stray dogs and the stray cats. Stray dogs were 97 and stray cats were 137. Injured animals were 14, rabies quarantines. That section right there was 259 that actually went into the Shelter, made it to the Shelter. The other side was the livestock, snakes and dead animals, which was 23.

Then I move on to the return to owner part of this. The return to owners for November was 126, which is still 44.8% up from last year's number. The microchips that we scanned were 311. Microchips found were 42. ID tags traced 28 and visible IDs were nine. Of course, and I kind of explained the last time of different types of things that we can't scan; maybe livestock, snakes, vicious animals or animals that have been dead and unable to scan.

And then going to the last slide, just to give you an encompass of the overall calls, the officers responded to 828 calls for service, 259 codes calls, which gave us 1,087 calls for service for the month. We responded to 48 injured animals, 17 cruelty calls, 69 vicious calls, and 20 bite calls.

The educated and/or got compliance on was 138 licensing, 88 permits, 141 vaccinations and then 49 care and maintenance violations. And I'll stand for questions.

Thank you Mary Lou. Any questions? Yes, Board Member Garrett. Good morning.

Good morning and thank you. Thank you for the presentation. I just have a question about the RTOs. There's a note here that says, "RTOs for November was 126" and then it says "44.8 from 20."

Seventeen.

Yes, what, how did you get that number? You're saying it's an improvement.

It's an improvement from last year at this time that we picked up for that month.
Garrett: So it's a 44.8% increase?

Ward: Increase.

Garrett: Okay.

Ward: That we picked up, yes.

Garrett: Okay, very good.

Ward: And returned to the owners.

Garrett: Okay.

Ward: So increase of return to the owners.

Garrett: Got it. Okay.

Ward: From last month at this time.

Garrett: The way I read it initially was it was 44.8% of the number in 20 and that would be going in the wrong direction.

Ward: Thanks for asking that. It's an increase from last year for the same month.

Garrett: Excellent, very good. Thank you.

Ward: Thank you.

Gandara: Any other questions? I have one. Ms. Mary Lou, do you know what the reasons are for picking up and impounding animals like cats and dogs? Do you have that data?

Ward: You mean what the reason for picking up stray animals are?

Gandara: Yes.

Ward: Well, if we don't pick up a stray animal it could be involved with maybe a bite, a vicious, or it could cause an accident. Different things like that.

Gandara: Right, but like for example, how many stray cats are tipped?

Ward: I couldn't tell you what the tipping was like, we don't pick up TNR. Well we will pick up TNR, I'll take that back, if we can scan them and find an owner for them, we'll return them to the owner. The stray cats that were picked up were 137.
Gandara: Yes.

Ward: The stray dogs were 97.

Gandara: Right. But I guess I'm interested to know what were the reasons in terms of like I don't know how many are bit, like how many when you separate how many are bites, how many are vicious, I don't know which ones are cats, I don't know which ones are dogs or there's another reason. Do you understand what I'm saying?

Ward: I don't think I'm following you.

Gandara: Okay. Let's talk about stray cats.

Ward: Okay.

Gandara: Right?

Ward: Yes.

Gandara: I know they're stray and I asked you how many are tipped, right? How many and if they're tipped they're microchipped, but like for example are colony cats, right? Are you still picking them up and taking them to the, because we have a huge population of cats and I just met with Best Friends last night and had a very lengthy and detailed conversation and I understand you all had training and such. And so I'm really concerned about this and so we really need to change philosophically our way by which we're handling that.

Ward: Yes.

Gandara: Or we're never going to meet those numbers.

Ward: I don't have the numbers as to how many were tipped or not. I know the officers are instructed to scan every animal that they can reasonably scan.

Gandara: Sure.

Ward: Stray cats a lot of times are in traps so they're going to scan over the trap. Sometimes they can pick up a scan. Sometimes they can't. So they do everything possible to scan the animal and get it to its owner. If it's registered to someone, they're going to call that person and try to get it to them as much as possible.

Gandara: Okay.
Ward: If there's no registry to anyone then we have a complaint there and we have to handle that complaint and then the animal will go to the Shelter.

Gandara: Okay. Now usually are the complaints just that they are stray? They're running around, they're spraying.

Ward: Sometimes, yes.

Gandara: Okay.

Ward: Sometimes it's a bite. Sometimes it's an animal that's attacked livestock.

Gandara: Sure.

Ward: Even we had the other day a cat that attacked some chickens.

Gandara: Okay. Yes. Thank you Mary Lou appreciate it. Any other questions? Thank you so much. Hello Mr. Gino. Welcome, good morning, come on up.

Jimenez: Good morning Madam Chair, Members of the Board. My name is Gino Jimenez, I'm the supervisor for Animal Control for the City of Las Cruces Animal Control. I'll present you my November numbers, November, 2018. As you can see from my report, we responded to 488 calls for service for strays, 260 of those were GOA, meaning the officer made no contact with that animal. We did apprehend 228, 198 of those went to the Shelter, 84 of them were dogs and 114 were cats. We were successful in returning 30 back to their owners after impounding in the ACOs unit. We did attempt to return 24 back to the owner, however they weren't home. They weren't willing to take responsibility, whatever, so those animals ended up at the Animal Shelter for them to have the opportunity to redeem from there. Out of that we had a total of 54 identifiable animals.

So here is our three-year comparison for strays. We're right in track with the last three years, pretty consistent right there. This slide shows you our four-year comparison for field RTOs. We're coming into our slow winter months, so there is a decline right there in field RTOs and that shows on the slide.

On my slide, I was talking to Bernice about this, and I asked her for some pictures to include on my slide. I see that everybody else is doing that so I said, "Hey, I should do that." I chose, and speaking to Bernice, I asked her for pictures of dogs that needed a little bit more exposure. Some that had been at the Shelter for a while and where that, what do you say, that hard sell, so I'd like to keep my slide up here as long as possible to give those dogs a little bit more exposure. But I will stand for any questions now.
Gandara: Thank you Gino, I appreciate that. Any questions? Yes, Board Member Smith.

Smith: Thank you Madam Chair. And thank you Officer Jimenez. I appreciate your sensitivity and thoughtfulness in this effort. I think that is part of what helps us when we begin our City Council meetings with information about animals that are up for adoption at the Animal Services Center. So thank you for your hard work, thank you for your presentation, and thank you for thinking about these animals who need a home. Thank you. Thank you Madam Chair.

Jimenez: Thank you for your kind words sir. Thank you.

Gandara: Thank you. Yes, Board Member Gonzalez. Good morning.

Gonzalez: You mentioned that you're very successful on 24 of them? Animals that you took to the Shelter and people didn't want to take responsibility? Is there any way we can do something about that? It's their responsibility of that ownership of that dog and now they don't want the responsibility. Isn't there any way possible we can do anything about that?

Jimenez: Madam Chair, Board Member Gonzalez. I think maybe the, my explanation should have been let's say for example, we pick up a stray dog that's microchipped to a particular address, however there are no adults home. So it's a child or a juvenile that is the only one that can be responsible for it at that time. However we cannot cite a juvenile, so that dog, that animal, must go to the Animal Shelter. And then the responsible parent/guardian can go redeem it from there. Those are the majority of those examples.

Gonzalez: Yes, but if they don't go back and redeem them. They're there at the Animal Shelter so it's still there, but there's still that responsibility of picking up that animal. I was wondering is there any way we can do something about that? You know people that have that responsibility, but don't take the responsibility of taking ownership of that dog.

Jimenez: Madam Chair, Board Member Gonzalez. That would be a charge of abandonment for them to outright say, "I don't care." "Take it to the Shelter." "I'm not going to go pick it up." We could charge them with abandonment.

Gonzalez: I think we need to do something about that because you know the Animal Shelter is taking too many dogs and these people aren't taking responsibility for their dogs so I think we need to do something about that.
Gandara: Board Member Gonzalez, what are your solutions? What are your next, what would you like to do?

Gonzalez: Maybe cite, I don't know cite them. Send them a citation.

Gandara: Sure. I believe that Mr. Jimenez has indicated that they're citing them, right?

Jimenez: Yes ma'am.

Gandara: With abandonment and other types of charges, if you will, based on our ordinance.

Jimenez: Yes, Madam Chair. Based on our ordinance those are the charges that they could be facing if they honestly claim that they do not longer want the responsibility and as an impoundment they just leave it there. Now there are other options. If the same situation an owner says, "I can no longer care for this." "I'm calling Animal Control for you to take it to the Animal Services Center." Then there's a fee that comes along with that transport to the Shelter and there's a form that they fill out giving ownership or relinquishing ownership to the Animal Services Center. So that's not one of, those are one of those non-chargeable offenses because at least they're making an effort to say, "Here you go, please find a better home for it." But to outright say, "I no longer want it." That's when we proceed with those abandonment charges.

Gonzalez: Well I think we need to do something about that.

Gandara: So if I might and even in that situation the Animal Services Center staff will also work with the owners to maybe will you foster for a little more or find a foster while they mitigate the circumstances right? So I think there are a lot of things, but what I'm hearing you say or what I thought was the issue is when an individual, any individual is at home, be it a youth or juvenile, and that dialogue is occurring can't cite the juvenile right, but someone's there, could we take it a step further and maybe call the owner, to say "You know we have your pet, can we leave him here and release liability." And I don't know with attorneys and liabilities and such if that's something. So for me that would be something we can have dialogue here with the Board, but also at our Task Force. So for me they're two very separate issues. One that we're already doing quite a bit because of ordinance and next steps in terms of the Center staff doing things, but for me the bigger issue is there is someone at home, but he's under age, he or she and maybe what do we do about those circumstances?
Gonzalez: Well, I can understand that. Well we could call them the next day or maybe that afternoon again and make sure that somebody’s at home sometime the person that’s an adult.

Gandara: Sure.

Gonzalez: And just tell them about that but not just say, "Well it was a child." "Just let it go." No. I think we need to continue calling until we find that that person is home.

Gandara: Good points.

Gonzalez: We could just give it up and say, "Well a child's home, we can't do anything about it." No, I think it's a continuation of doing something about it.

Gandara: More diligent efforts, I think is what you’re suggesting.

Gonzalez: Yes.

Gandara: Okay, I understand. I hear you loud and clear. Yes I do. Yes, Vice-Chair Williams.

William: Madam Chair, Board Member Gonzalez. I think that it’s important for us to remember as a Board that we are the governing Board of the Animal Services Center. The Animal Control Officers are governed by the City of Las Cruces and Doña Ana County respectively. And so I think that the points you’re making are very well stated and appreciated, but it would be up to our colleagues on the City side to give direction to Animal Control about how to conduct these field operations that you’re mentioning as well as the folks from County would be able to give direction to our folks as well. But we as a Board don't have the authority to tell Gino how to do his job. He doesn't report to us.

Gonzalez: I'm just suggesting you know because we’re see a lot of these dogs come to the Animal Shelter and it's becoming too much of an over-population. I think that we need to find some way to help them with what’s going on.

William: I completely agree with you and I just want to make it clear to the public, anybody who’s watching, that I think your suggestions are spot-on, however they're going to have to, any direction to Animal Control, is going to have to come from the specific entities that oversee Animal Control.

Gonzalez: Think up some action.
Jimenez: Madam Chair, Board Member Gonzalez. We actually started the Field RTO Program I believe three or four years ago. So this is relatively new. Of course there's always going to be bugs that need to be worked out. Our numbers have gone up since the beginning of the program. Now, I believe that for the City's part at least, we have maintained that consistent number over the last couple of years. We can work, I will take your suggestions back and we will discuss it with my administrative staff and see what changes we can make to our program to make it more effective in the manner that you're speaking of.

Gonzalez: I would appreciate that. Thank you so much.

Jimenez: You're welcome sir.

Gonzalez: Thank you for your.

Gandara: Thank you Board Member Gonzalez. Board Member Garrett.

Garrett: Well, the first thing I want to say is we've done a really good job of keeping two dogs up on the screen for a while. I just want to reflect a little bit that there's an important point that's been made by Mr. Williams in terms of respecting different authorities and at the same time the fact that we have the ACOs present at the meeting now and we didn't for a long time, I think it's an indication of recognition that it's a collaboration that's needed in order to deal with what goes on at the Shelter. The Shelter ends up being the sort of focal point for a lot of this concern about animals and there are many different players. It's basically why we also have included reports from the Zero in Seven the Coalition reports on activities by advocacy groups and individuals. It's not that we have control over any of those things, but I think this is a place where we can share information and being able to share that information is, I think one of the hallmarks of what we're doing to improve the conditions at the Shelter with the animals in the community. We've got to remember the rules and we've got to be able to take advantage of the opportunity and I think we just saw a demonstration of that. I simply wanted to add that I appreciate the reports that Gino that you've brought from the City, Mary Lou that you've brought from the County, and I appreciate your willingness to share that information and to work with us.

Jimenez: Thank you sir.

Garrett: Thank you.

Gandara: Thank you Board Member Garrett. Something that we could probably put in our Task Force agenda to have continued dialogue about and moving in sort of maybe increasing our RTOs for the City. I am speaking for the City
and I'll certainly have conversations with Mr. Dollahon and Mr. Ed about that as we move forward. So thank you.

Jimenez: Absolutely thank you.

Gandara: Thank you Gino, I appreciate all your work and again your thoughtfulness and those dogs are just beautiful right? We're just enticing the folks to really come on out and look at these doggies and make sure that we give them a forever home.

Jimenez: Yes ma'am.

Gandara: Thanks Gino.

Jimenez: Thank you.

**B. Shelter Statistics and Activities/Educational and Spay-Neuter Initiatives**

- Clint Thacker

Gandara: Okay, next on the agenda will be our shelter statistics and shelter activities to include educational spay and neuter initiatives. Mr. Clint Thacker, come on down. You see a theme here? Come on down.

Thacker: Thank you Madam Chair. Actually I'm sorry. Before we begin, I'd like to ask our safety coordinator and the City individual that's responsible for our Shelter remodeling, if you would like to come up and give the Board an update on how that remodeling project is going at the Shelter.

Gandara: Good morning. Would you please state your name for the record?

Kinney: My name is Michael Kinney, Project Manager with the Public Works Department Contracts Administration.

Gandara: Thank you Mr. Kinney.

Kinney: The project, if you've driven by there, is finally starting to take some shape. Right now they have the exterior insulation being installed and the overall project right now is about 50% completed. Depends on how you look at it. If you look at it from a cost standpoint, last month's pay application was what brings it up to about 40%. If you look at timeline, it's about 60% into the calendar days so it's about 50% completed. It's currently on schedule and within budget. On schedule being from the Warren Construction what they're doing and of course within budget is what we have in the purchase order, which includes contingency.

   We've had several days, rain delay days, there's been a couple of holidays where we've asked the contractor not to work because the City
was closed. All of that has extended the schedule date of substantial completion, which is now scheduled for February 14th, which is mid-February. Initially it was near the end of January. Current completion date of February 14th could also be moved up somewhat depending on additional conditions.

The contractor is doing the interior work in two phases to try to not impede on the day-to-day operations of the Shelter or impede only as much as necessary. So some of the work that has been done is all of the structural framing has been completed and this is a photograph basically showing that some of the extent to which the structural framing is done. Not only are the metal studs, they are put together with screws, but also they're tack welded together. So the whole thing acts as a system. The steel roof joists have been placed. The metal roof deck has been installed as well as what's called "dried in", where there was insulation on the top and then there's a waterproof membrane that's been over the top. Final roofing will be completed in the next coming weeks.

On the interior, most of the steel doorframes for the new doors have been installed and of course part of the structural framing, the window framing has also been completed. This photograph on the right hand side on your screen was taken before the insulation on the outside was put in. All the window openings and stuff have been formed out, if you will, or what they call the wood box have been installed, and the waterproofing membranes have been placed over those openings.

On the interior on the left hand side of the photograph are the electrical conduits, which it was decided that we're going to need to route those through the small dog room and then into the cat room. So there's a whole bunch of new electrical conduits, including the large conduits for the new electrical panel. And the contractor did a really good job, nice job, and of course those will be painted to match the color of the roof so it isn't exposed.

In the middle photograph, that's some of the electrical and data conduits for the new reception area, for the desk, those needed to be added. In the picture you'll see that there's some water on the floor. That was from the rains latest rainstorm we had, we had some blowing, it actually blew in through the window openings. The roof did not leak.

And then on the farther right hand side photograph, some additional plumbing work needed to be done. That's where a sink stub out will be for the cat room. That was in a location where there was an old existing plumbing for the sink, but the line turned out to be clogged and deteriorated so they had to saw cut through the slab and replace that. The City Facilities section is going to be picking up the cost for that because it was part of the existing for that, so as far as the purchase order is concerned that will be increased by that amount from the City funds. We'll just do a Munis transfer from that.

Mechanical on the HVAC, one of the rooftop units has already been placed, of course it's not in service. Ductwork is being installed as we
speak and also in the cat room they are also, the new cat room the ductwork is going. In fact there is a lot of, there's a flurry of activities happening. You know it took a while to get things going. You have to get the dirt work, the concrete, the slab, the framing, etc. Now that most of that, the building is starting to take shape there's many different trades are working in conjunction. We have the HVAC got the duct work, electrical work also still what we call the electrical rough-in, the plumbers are installing the water lines for the new bathroom and the new sinks.

So to look ahead for the rest of this month up through about mid-January of next year, of course the ductwork, HVAC is in progress. That should be finished, I'm talking about basically for the new addition and then the cat room. So the electrical should be roughed in. All the plumbing should be finished. The exterior finish and was called EIFS, that's an Exterior Finish and Insulation System. It was decided instead of doing a, the plans called for a stucco, what they call a three-coat stucco system, but the existing building as it stands right now has what's called an EIFS System. That's an actual system where it's an exterior finish and combining with insulation system. So to match the existing on the building we decided there's no cost difference so we decided to go basically with what's called the EIFS System on the outside. That should be completed.

The site concrete work for the sidewalks, in fact at least half, a portion of that will be poured tomorrow morning, scheduled for about 6:00 in the morning. They'll be pouring some of the sidewalks and of course on the inside the drywall work is in progress.

The insulation for the roof and stuff will be installed and the goal is that by mid-January the new addition should be basically ready to move in for occupancy in other words. That way the administration section and the portions that are being used on right now by staff they can all move into the new cat room and then into the new lobby and with the conference room etc. And then the contractor will then go into the what's the administration office right now and they have to punch a hole through the wall and then do the add-on, finish the add-on for the administration. That should happen probably in mid-January with everybody moving over. And that's it. Any questions?

Gandara: Thank you so much. We appreciate that very thorough explanation. Any questions? We're very excited. February is around the corner and I'm thrilled to see how quickly and on time really the schedule we are, so thank you, it's much appreciated.

Kinney: Thank you.

Thacker: Thanks Mike.

Gandara: Mr. Thacker.
Thacker: Yes, what Mike didn't tell you is that we found a floor safe way back in the very back in the adoption room where the filing cabinets were sitting on top of it and we had no idea. Our longest employee there, Curtis, he said he knew about it, but didn't know the combination to it. I contacted Kathy with Doña Ana County Humane Society and none of her board members knew anything about it, because as you know, the Doña Ana Humane Society used to have that building. So we did have to break into that safe just to be sure that there's nothing in it before we pour concrete over it.

Gandara: Darn it. You didn't find a bunch of money?

Thacker: No, however a lot of feral cats started coming out.

Gandara: Oh dear.

Thacker: And we put the lid back on it. No, there was nothing but rust in that safe.

Gandara: Okay, all right.

Thacker: We were happy to see that there's nothing in there.

Gandara: Good. Yes, it's always a surprise right?

Thacker: It is something new.

Gandara: Thank you.

Thacker: New work, doing new work in an old building. I'm going to go through these kind of quickly.

Gandara: We should have done a geo-cash thing there.

Thacker: Yes, we should have.

Gandara: Yes.

Thacker: We still can.

Gandara: Okay.

Thacker: It's still a possibility.

Gandara: Okay, all right. So people who are into geo-cashing.

Thacker: Yes.
Gandara: Think about it.

Thacker: So the City of Las Cruces brought in 496, Doña Ana County 393 and then a few coming from Anthony, Hatch, Sunland Park and the other unknown for a total of 929 animals in November. So comparing that to November of 2017, we have quite a bit more over 100 more animals coming in. I think you're going to see some higher euthanasia numbers with that and that's because. In 2018 we brought in 501 dogs and cats was 406, but in 2017 it was 490 dogs and 317 cats, so quite a few more cats was what's bringing us up.

For adoption, it was 223. We had 88 reclaims, 306 rescued animals and euthanized was 318. So our live release rate is settling now at 69.4%. Cats are the one that's bringing us down there and that will always be the case until we can make something change for that.

So to compare to see how we're doing, we did more adoptions in 2008 then 2017, 147 versus 223. We had less reclaims and we rescued more and we euthanized more, so the live-release rate dropped that 10%. The euthanasia's again are coming up because of higher intake, a healthier Shelter population that we're doing. We're doing practices where if an animal gets to the point where it shows, for instance neurological signs of distemper then its kennel mates also have to be euthanized as well. It's a safety protocol that we've instituted and it was told to us by the Austin Pets Alive and also Best Friends both support that action. Sounds harsh, but that virus was shedding that entire time for weeks and weeks while that animal had distemper and then finally showing the advanced signs of distemper, which is the neurological, the other animals by that time are also shedding the virus. So that's why it's a little bit higher, but we continue to have positive outcomes from doing that with having a healthier herd or a healthier Shelter population.

So our grand total of our number count at the Shelter, in 2017 at this time, I think this was my very first presentation, was a year ago now to the Board, 754 animals were in the Shelter and now a year later we're at 608. So we do continue to drop down in small increments in getting that population lower and lower.

Our volunteers continue to do great and marvelous things for us. As you can see no dog or cat goes un-held or unloved at any point while they're there at the facility. Volunteers again, what they do is they give their time. I can give my money up no problems at all, but I think my time is my most precious thing and for them to sacrifice that time is incredibly valuable for us. We had individuals doing laundry, dog enrichment, visiting, doing the Farmer's and Petco Adoptions Events and then our other off-site events such as the PetSmart, Kia and we had a new one at the Picacho Brewery in November as well. So we had some amazing hours there, totaling 448 in the month of November. Continue to do others, Pet's Barn, County Cats, photography teams and vet tech. And
one of our photography team members is here today to do a picture with us later on.

We have 56 families with 125 animals in them for fosters. And then surrender to foster is a program where an individual comes into the Center and says "I need to surrender" or "I need to give up these animals" and we say "Is there a way you could hold on to the animal and we will contact you when we have room?" and they said, "Absolutely." So that one family did that save those six animals from coming in and generally, usually, it's a mom with puppies is what it is.

Our foster program, I mentioned before, this is individuals that come in and they welcome an animal into their home, whether it be a special needs animal or it be a sick animal or a perfectly healthy animal, these are 56 people that open their homes to animals that can get healthy or have great lives in their homes. These 56 families bring these animals to other off site events and parties so they can get adopted. And that's an incredible advantage to us and also the animal because then the animal gets to be, the family gets to know the animal and they can say "Yes, this dog loves to do this, loves to do that, loves walks", so great information on that. Here are some of our dogs. Some of our spay and neuter initiatives that we've done at the facility. We had 209 animals in the foster to adopt program. That number will continue to go down as we focus on this program and also our Animal Shelter population.

We did 60 general public sterilizations and also 90 of the community cat program sterilizations. Total surgeries in November: public 150, adoptive 105, shelter 273, for an incredible amount of 528 Sterilizations in the month of November.

Some of our educational initiatives that we're doing. We continue to educate, whenever somebody comes into the Shelter. We had a grand total of 2,704 in 2018. That's 1,546 into the adoption office and 1,158 into our reclaim office.

Our community outreach, I actually was able to go with Dominique to 101 Gold, Magic 105 and Zia Country. It was a lot of fun. We are doing something different now. Instead of taking the animal to the radio, we take an awesome video of them out with employees or volunteers and then we present that video to the radio station and then they can post it on Facebook and it just gets a lot more attraction and attention than actually bringing the animal in. Not only that the animal is under a lot of stress with the new areas and new smells, and sometimes they like to mark the area that's brand new to them and that's not very much appreciated whether it be in the drive over to the place, to the radio station, or there at the radio station. So we took that stress away from both the individual taking the dogs there and also to the animal and doing the video and we've gotten very successful results on doing that.

We continue to work very closely with Wilson Binkley advertising campaign. They in fact were able to design some new sympathy cards for us that have our logo on it. We present these cards to individuals who
have to turn over their animals and have them euthanized for old age or sickness, things like that. It's just a little extra heart-to-heart that we, a lot of the staff signs them and then we mail them out the next day. We made them into the same size as our envelopes that we're using so we didn't have to purchase new envelopes. It's a great thank you for that. And then we also had them redesign our thank you cards for somebody who brings a donation in. So the donation has our new logo on it and a great message inside. So we appreciate all that they do for us. Again Jessica is incredible to work with there. It's just a simple e-mail and she's right on it and comes back with some great ideas.

We continue to be in the Dog'Cruces Magazine, American Classifieds, our ASCMV Website and Facebook has phenomenal success, continues to grow in likes. The biggest thing and the best thing we're doing is we have added to the individuals or the amount of people that can post on it, so the Admin for the website or for the Facebook page. And since we've done that, a lot more people can answer the questions that are coming in and a lot more people can add a lot of fun stuff. If you have not liked our Facebook page, I encourage you to do so, because not only do we have all these fun things and it announces all of our great programs that we have going and specials on our animals, but we also publish our daily stats for that 24-hour period. And so it's a way to engage and let the public know of the challenges we have there at the Animal Services Center. So that's a really big eye opener for them. We continue to do the Senior Program with Doña Ana County Humane Society, eight dogs and the cats, which is a great program. There's Flare, Kittles and Rita. Kittles has a question it looks like. And that's all that I have for that. Before I turn the time over though, Madam Chair, I'd like to take a moment and recognize two of our Board Members.

Gandara: Before we do that Clint, let me just see is there any questions, concerns, feedback for the Director's report? Seeing none. You are free to move on to the presentation. Thank you.

Thacker: Thank you.

Gandara: Yes.

Thacker: So as Madam Chair you are very well aware we're going to be losing two of our Board Members for retirement. Jess Williams and Billy Garrett. As much as I do not want them to leave, I still respect their decision to retire, grudgingly. But first I'd like to present a Recognition Award to Jess Williams, and this crystal award and it states on here, "Jess C. Williams in Recognition of your Dedicated Service to the Animal Services Center Board of Directors 2010 to 2018. And I'd like to read something here that goes along with this crystal award. It says, "For the Times Square 2000 Millennial Celebration at the Crossroads of the World, the New Year's Eve
Ball was completely redesigned in crystal. In 1966 crystal chandeliers were installed in the Westminster Abby in London for the 900th Anniversary Dedication of the Church. Crystal chandeliers hang in Windsor Castle, at the Kennedy Center, in Washington D.C. Some popular awards such as the People’s Choice Award, the French and German Grand Prix Formula One, and Tennis Master’s Series Tournaments all use crystal as the award. So why the focus on crystal? Crystal is glass with lead added to it. It shines bright. It's beautiful, reflective and causes others to stop and admire it. Jess Williams has a way to inspire and help and advise to the point you believe you can do almost anything. But just like the heavy lead added to the crystal or added to the glass, he also keeps you on the ground and reminds you that it's the animals we are here helping and it's the animals we are serving. So with Jess's advice of, "Shine On", always ending in all of his Facebook posts, the Center presents this crystal recognition as a way for you to always remember that you have shined on all of us. Thank you very much for your service.

Gandara: Thank you.

Thacker: And I have one for Billy as well. But Billy's is a little bit different. Billy's is in the shape Pegasus the mythical horse. And let me read to you why. At the beginning of his life, Pegasus was a wild but noble creature. He was drawn to clear tranquil springs who inspired humans to pursue poetry, song, dance, art, history and astronomy. Pegasus himself was an inspiring figure. Countless painters and sculptors tried to capture his beauty and power. Besides his ability to fly, which literally set him above all other horses, Pegasus has an arsenal of supernatural powers. Wherever his hoof struck the earth he created beautiful springs with water that could inspire everyone. Much like Pegasus, Billy Garrett has the capability to inspire others. He has been able to strike his hoof so-to-say and inspire groups of people to better the animals at the center and all of Doña Ana County with coalitions meetings and most of all action. Thank you Commissioner Garrett for all you’ve done for the center and for our animals in our care. Thank you. Thank you for that. That's all I have.

Gandara: Thank you Clint for that beautiful gesture. It's much appreciated to you and your staff. Thank you. Very thoughtful.

C. Committee Reports

1. Finance - David Dollahon, Committee Chair

Gandara: Okay, on to committee reports. Finance. Hello.
Saffell: Good morning Madam Chair, Members of the Board. My name is Josh Saffell and on behalf of the Finance Department I would like to present the unaudited financials as of November 2018. Here on our second slide we see the Balance Sheet. The General Fund is showing about $462,000 in cash and close to $89,000 in receivables. There’s a $76,000 showing for total liabilities. That includes the $20,000 that we received in advance for the PetSmart Grant. So we recognize that as a liability until the expenditures hit. For fund balance we have a total of $474,000, of that $251,000 is our required reserve and that leaves an unassigned fund balance of $224,000.

For our operations we show the General Fund showing $1,390,000 in revenues and total expenditures are at $1,136,000. So this left us with a positive change in the fund balance of $254,000. The revenues for the month are at 47.7% and our total expenditures are at 37.8%. Our budget parameter is 41.7%, so revenues are looking good and so are our expenses as well.

Here we show actual revenues compared to the budget. The actual revenues of $1,390,000 are mainly due to Doña Ana and City contributions as per the Joint Powers Agreement.

This is our expenditures comparison. We see almost all expenditures are below the 41.7 budget parameter. With two exceptions, that would be the insurance which is at 43% and services which are 43.9%. The insurance, of course as we discussed is a matter of when the premiums are paid and the services again that went back to the increase in costs that was incurred for medicine and other things that took place several months ago. So those are why those are, but we can see that they are coming down and getting closer to that parameter amount of 41.7%.

In our capital projects fund we show cash of $898,000, liabilities of $77,000. There is a restricted amount of $50,000. That is for the amount for the cat room that’s set aside specifically for that. That’s why we’re showing that as restricted and, of course a committed fund balance, committed because it is set aside specifically for the construction, of $771,000. So that will conclude the presentation for November financials. Are there any questions?

Gandara: Thank you Josh. Any questions? Yes Mr. Dollahon.

Dollahon: Josh could you go back one slide to the restricted? Could you follow-up with Public Work staff? I don’t know where they are in the billing for the contractor, but I want to make sure that they’re allocating that and they’re aware of that $50,000 as they need to be itemizing that bill out so we can. I don’t think they’re there yet, but could you follow-up with them to make sure that they’re aware to have Warren itemize that out as their next bills come in and we may need to do corrections if there were cat room expenses beforehand up to date. So, if you could do that.
Saffell: Yes. Make sure that Public Works is getting us that information, so that we can make sure that's adjusted correctly.

Dollahon: Yes.

Gandara: Thank you Mr. Dollahon. Any other questions? Thank you Josh. Appreciate it. Happy Holidays to you.

Dollahon: Madam Chair. On the rest of the Financial Report, we don't have anything else to report.

Gandara: Okay. Thank you.

2. Executive - Kassandra Gandara, Committee Chair

Gandara: Okay, Executive Meeting. We met impromptu yesterday. We spoke of the agenda. Clint gave me updates on what's happening in the facility. Lots of work being done, transitioning from one data system to the other, and I think that's exciting. We had a visit from Best Friends, so we had a meeting specifically last night to discuss some of the strengths and areas of improvement and a report that we expect in the next few weeks. I understand that there will be a visit. They will be coming back. Jessica specifically, the week of, I want to say January 7th, and she will be here to give a presentation at our next Animal Services Meeting in January. So really looking forward to that and that's all I have I think at this point.

3. Facilities - Greg Smith, Committee Chair

Gandara: Facilities.

Smith: Thank you Madam Chair. We didn't have a quorum, but Mr. Thacker and I looked at the facility at what was going on there and he pointed out several things to me. A very good report from Mr. Kinney that's very helpful as far as what's actually happening with the construction. But also Mr. Thacker pointed out that of the five HVAC motors, three have had to been replaced recently.

Also one of the things that Mr. Kinney mentioned, he was showing where there was a plumbing change and that has resulted in the facility, Animal Services Center having to use a laundry service to take care of all of the things that need to be washed and so that's ended up being rather expensive, however it's also fit within the budget since there were contingencies.

One of the things that wasn't mentioned, but which was pointed out to me by Mr. Thacker is that we're having data ports installed in the kennels and various areas so that much like what you see at a hospital

21
where people are able to go around and log-in and keep up with things. 
That same sort of capacity will exist at the Animal Services Center, which I 
think is very up-to-date, very current, very appropriate.

Also where the house down under used to be, they were able to 
tear it down. There was no asbestos so there was no worry about that. 
And five kennels are going to be added there. So I think the facilities area 
is coming along very well, certainly a lot of exciting work happening 
currently. And the ongoing discussion about what will be happening with 
the GO Bond. Thank you Madam Chair.

Gandara: Thank you Board Member Smith. Any questions, concerns?

D. Zero in 7 Update

Gandara: Okay. We are moving to the Zero in Seven update. Ms. Gilbert. Good morning.

Gilbert: Good morning. Jean Gilbert, Secretary for the Coalition for Pets and 
People. Here is the Coalition mission statement which was adopted in 
March 2017. Here is the listing of animal welfare organizations that will be 
represented here in the PowerPoint. The Coalition, this is a list of 
activities we were at a special meeting, or Rick was at a special meeting 
that he organized on spay and neuter, and that was November 1st. The 
Coalition was represented also with an ACTion Programs for Animals 
microchipping event with ACES in Salem on November 3rd. Many 
Coalition members attended the Animal Care Task Force meeting 
November 16th. And then Rick I know represented, and there were other 
Coalition members for the Caroling for Kitties, which was November 25th. 
And here’s some information on the spay and neuter meeting. They 
discussed and I know Clint was at that meeting, and there was an 
inventory of what the area spay/neuter services are. And then now 
formulating questions based on those services in terms of what are going 
to be next steps. And Dr. Short has offered to provide services at the 
Shelter and of course that has to be worked out.

Here are some of the upcoming events and there've already been 
some pet photos with Santa. I think just about every pet in Las Cruces will 
have had an opportunity to have their photo taken with Santa between 
S.N.A.P and Safe Haven and APA and other area groups. And in addition 
to those pet photos with Santa, HSSNM is doing a Holiday Gift Box 
Project. And the next coalition meeting will be, we’ve taken a hiatus on 
meetings, but we'll be starting back up in January.

Here are S.N.A.P’s numbers, year-to-date through November. I'll 
let you take a look at those numbers. With the vouchers issued and the 
number of dogs and cats that have been spayed and neutered and also 
the animals that have been spayed and neutered through their mobile 
clinics, which they've had about one every month this year. Here are the
pictures taken from the S.N.A.Ps Pet Photos with Santa. They had the 
Grinch and Santa there both and that was November 25th. Caroling for 
Kitties, which is the next slide was also there. It was quite almost like a 
bizarre feeling between S.N.A.P's raffles and the Caroling for Kitties and 
inside were the Pet Photos with Santa was very well attended. The 
proceeds, the tips from the caroling went towards transport costs for Cat's 
Meow and ACTion Program for Animals. Caroling for Kitties was blessed 
with having the Ukes Group, some of the members there. I think you can 
see Rick, our Chair of the Coalition there in the back standing between 
Michelle Corella and Chris Widra and Elaine Stachera sitting almost next 
to Santa. There's a person in between I don't recognize, but Elaine was 
the coordinator for the Caroling for Kitties.

And Cat's Meow this is their report. They have adopted over 70 
cats this year, which I think is totally amazing. And one of their board 
members Alison Reynolds is a very accomplished musician and here 
she's shown at, I'm not sure this is exactly at Vintage Wines, but it's one of 
the events that Allison did for Cat's Meow with her tips going to Cat's 
Meow and then Vintage Wine donating a percentage of their sales.

And Michelle Corella, I think I told you last month that Michelle had 
given a report, Michelle Corella for the Big Kitty Fix, but she didn't get it to 
me in time to have it in last month, so here it is and here's a breakdown of 
their amazing numbers since 2012 for spay and neuters and these are 
largely community cats. And of course it includes not only the cats have 
been spayed and neutered, but they've been vaccinated, microchipped 
and ear tipped. Michelle wanted to include a thank you to the community. 
Thank you to Dr. Starr and Martin for the Big Kitty clinics that they were 
the participating veterinarians that was for 2012-2015. And then in 2016 
Dr. Calista and her staff started hosting clinics on Sundays. And so Dr. 
Starr and Dr. Calista, they are very grateful to them and their skilled staff 
because it wouldn't have been possible. And they thank, also thank 
S.N.A.P because S.N.A.P. offered the use of their clinic from 2012-2015. 
And of course thanks goes to all the people who recognize the importance 
of spaying and neutering and that includes the colony managers, many of 
them, they're all spending money out of their own pockets to help cats.

Broken Promises Southwest, here are three cats that were recently 
TNRed and of course they address feral cat over-population through TNR 
as well as having a sanctuary for injured and un-releasable birds. And 
they offer a foster/adoption program. And in the next slide you'll see a 
picture of their cattery, outdoor enclosures. In addition to that work, 
Broken Promises makes out shelters for colonies. I know Joe offered 
eight that got taken immediately that he had made that were up for grabs 
and they got snapped up right away. And also Rachel Snyder and Keith 
Whelpley, who volunteer with APA, constructed something like 20-some of 
these types of enclosures here recently that went to outdoor cats.

The Humane Society of Southern New Mexico’s Report the picture 
on the left and the picture on the right are from humane education
programs, Critter Connection Program. Zee is Teresa Ray's handsome New Finland and that's him being much loved at Onate High school. And Casey Jobling, who's on the board of HSSNM with her little Teddy, who's a maltese/poodle mix at Grace Village. In the center is a picture of a couple who adopted a kitty from us who is a tri-pod kitty named Ellie.

Here are numbers. We've had 41 adoptions through November. Twelve-hundred calls to our help-line, 295 sessions in humane education, I wanted to point out that out of those we went to Vado Elementary and met with four second-grade classes and did humane education sessions with them. There are on-request sessions so they're in addition to our Forever Friends Program and our Critter Connection Program. We also had an on-request to go to Connelly Elementary, where we did four kindergarten classes. We've helped 168 animals through our Cans for Critters Program and I was so excited to see the number go to 8,000 now. That's pretty amazing. Our microchip numbers are around 6,350 since 2014. This of course is a wonderful update. You can see these semi-feral kittens how they looked a year ago and what they look like now and it's just so inspiring.

ACTion Programs for Animals here are their numbers, their intake 12, adoptions 20 and microchips 17 for the month. Out of their many adoptions last month you can see this German shepherd pictured at the facility being adopted and then the picture to the right showing him how quickly he adjusted in his new home. I think, of course APA we know they are so progressive and the things they do are so amazing and to offer like sleepovers for their animals for people to try them out and they've been very successful with adoptions through that. Here's APA's report, a breakdown of their numbers through November 30th. I looked back at some slides because I was a little confused by this because it says "through November 30th", but then when you look at the bottom there, it says the total for August, which equals that number there. So I was a little confused so I went back over the slides previously because we had some breakdowns in October and then, of course I have all their numbers through November. And so I counted 708 that they have rescued from January through November of this year. So that's really amazing.

Cherished K-9's a picture of Coleman one of their adoptions this month and that he is noted that he is in agility training with his new mom proudly pictured there. I mentioned Rachel and Keith volunteering with APA and also helping Cherished K-9's with this wonderful donation of supplies to Cherished K-9's. I would like to note that there are some heartbreaking things that happen in rescue work and you might be familiar with that Cherished K-9's rescued Clover out of the Animal Shelter and she soon thereafter had thirteen puppies and sadly each and every one of them died. So this is the kind of thing that sometimes happens in rescue. Very, very heartbreaking and Carla, in going back and getting some more information, learned that this dog had had puppies less than a year apart
so it's just so sad. So it's been quite an emotional roller coaster for them going through that.

Here are some slides of Doña Ana County Humane Society their programs. I know Clint mentioned, I thought he said something about eight adopted through their Senior Program for the month of November which is wonderful. And then they have their Animal Relief Fund and this is a picture of a little probably poodle mix in the middle there who had cherry eye that was helped with the R-Fund. And then Doña Ana County Humane Society as part of one of their recent fundraisers did the Paw-Purr-Razzi Photo Fundraiser and there's a picture of a couple with their little dog that participated in that.

And Safe Haven a picture of Dallas with his new family one of their adoptions for November. And another adoption of this couple were their adoption fee was waived through Picacho Public School Kids with their project called Random Acts of Kindness and there is the letter from the school from the kids that are in that project that the lady is showing there. And then Safe Haven does Humane Education and this is a picture of one of their dogs available for adoption at act and academy. Safe Haven has adopted approximately 25 animals year-to-date.

Okay and Tails, I think most of you know that the Last Litter Inn closed its doors the end of November. They operated for three and a half months. During that short time they did amazing work helping 16 moms and 161 puppies that checked in there at the Inn, and also 12 special guests. They did all this with seven unpaid staff and many volunteers providing over 3,000 hours of volunteer work. So I think it's important to acknowledge the important work that they did. And to all the donors as well and supporters and rescue people that were involved in that. Here are pictures of a couple of the mom dogs with their puppies; Onyx and Zora that were in that Last Litter Inn program. And Tails has an adoption and foster program and Wilbur was rescued by Tails from an awful situation and recently adopted. And then you can see a picture of Wilbur with his teddy bear in his new home. Below is Quinn who was pulled from a high-kill shelter in Roswell and later adopted by the Tails foster.

Forever Homes Animal Rescue pulled these dogs from our ASCMV Animal Shelter and transported them to Albuquerque. They've helped over 2,000 animals, mostly dogs since 2016. Jamie Jones is the coordinator here in Las Cruces and their headquarters are in Alamogordo.

This is as mentioned before the Las Cruces Pet Network advocates for animals in a variety of situations, animals in need. And this is a current situation of a so-called sanctuary that the owner has been evicted and so they're trying to find placement for 80 dogs and this is in Deming.

The Dog Park Coalition they have built a new hill at the Dog Park and the dogs are really enjoying it. There's a picture of Kevin Armstrong who is the president with his dog Roxie at the park. And then you see some dogs pictured there enjoying the cooler weather playing Frisbee. And that's the end if you have any questions.
Gandara: Thank you Ms. Gilbert. We really appreciate you and all the efforts of our rescues and our advocates and Happy Holidays to each and every one of you. Any feedback, concerns, issues? Okay, thank you.

V. Action Items

A. Resolution 2018-26: Adoption of the ASCMV 2019 Holiday Schedule

B. Resolution 2018-27: Reasonable Notice of Meetings 2019

Gandara: Okay next on the agenda is our action items. We have two, Resolution 2018-26, Adoption of the ASCMV 2019 Holiday Schedule.

Williams: Madam Chair.

Gandara: Yes.

Williams: May I move approval of both items A and B on action items, agenda item six.

Gandara: Thank you. Do we have a second?

Garrett: Second.

Gandara: Any dialogue?

Eakman: Yes Madam Chair.

Gandara: Board Member Eakman. Yes.

Eakman: I find I’m trying to resolve in my mind resolution number 2018-26. It’s titled Holiday Closure Resolution, but instead it gets into the Holiday Policy. And I wonder, I’m not sure if that’s what’s happened every year. If I’m reading this correctly, Mr. Thacker maybe you can help me interpret. Are you planning to be closed seven days during 2019 as it states?

Thacker: Yes. The holidays that are listed there are the holidays that the Center will be closed.

Eakman: And in my own mind I’d be very satisfied if it ended there. If the resolution ended there just stating the days they were going to be closed rather than explaining probably City Policy on how holidays are administered for our fulltime and part-time employees. I'm bringing that up for clarification and I would ask consideration of the Board of helping me understand this or re-title the resolution.
Thacker: Before I just stepped up here, Bernice did tell me that that's the way that it's always been the way it's been presented.

Navarro: The bottom part of it, we've always presented those. City observes additional days that they close for these holidays. At the Shelter we had decided years ago that there were certain days that we are actually not closing, but the employees do get them as what they call "floating holidays." So they are considered part of our holidays, but we're not closed. So they can use those holidays throughout the year after they've earned them at that time. So that was the difference, in just having the explanation for the two separate sections on it.

Eakman: Thank you. I would be just fine if I was the only person who voted in the negative on this and everybody else passed it. I would just hope that in the future we could have more clarity on what the resolution actually is to state.

Gandara: Thank you Board Member Eakman. Board Member Smith.

Smith: Thank you Madam Chair. And I think for further clarification, Mr. Thacker if I understand correctly when we say "closed" that means closed to the public, but there will still be some staff present to make sure that everything is operating safely and humanely and that sort of thing at those times.

Thacker: Yes. All animals are cleaned, cared for, fed, full water, yes.

Smith: Thank you. Thank you Madam Chair.

Gandara: Board Member Garrett.

Garrett: Madam Chair. I think that Board Member Eakman raises an important point and I'm wondering if it could be clarified by adding some language to the title of the resolution so that the Resolution title said, "Resolution Approving the 2019 Holiday Closure Schedule and Employee Holiday Policy for the Animal Services Center for the Mesilla Valley".

Eakman: I would support an amendment to that effect.

Garrett: That being the case, I move that we amend the title to insert the words "and Employee Holiday Policy" after the word "Schedule."

Gandara: Okay.

Smith: I'll second.
Okay, there’s an amendment on the floor. A motion to approve by Board Member Eakman, second by Board Member Smith. Yes, Board Member Gonzalez do you have a? Your light is on just so you know. Oh you’re ready, ready to vote. Okay, please poll the Board.

Board Member Gonzalez.

Yes.

Board Member Eakman.

Yes.

Board Member Garrett.

Yes.

Board Member Smith.

Yes.

Board Member Williams.

Yes.

Chairperson Gandara.

Yes. So the amendment passes correct? And now we’re at the actual passing of the resolution. Both of them? Do we have to separate them or can we vote. Okay, so we are voting on the resolution with an amendment. Is there public input? Thank you Board Member Garrett. No public input, okay.

Board Member Gonzalez.

Yes.

Board Member Eakman.

Yes.

Board Member Garrett.

Yes.
Baum: Board Member Smith.
Smith: Yes.
Baum: Board Member Williams.
Williams: Yes.
Baum: Chairperson Gandara.
Gandara: Yes.

VII. PUBLIC INPUT

Gandara: Okay, on to public input. We have some, okay come on down Mr. Bryce. Good morning.
Bryce: Frank Bryce, Humane Society Southern New Mexico. First off I want to wish everybody that's watching and you folks happy holiday and safe one. We have had an interesting year. I was very pleased with what Jean just presented. Unfortunately, that thing over in Deming is not getting cleared up very quickly. I was called this morning. If anybody wants to donate to feeding the animals that are left at this point, they can contact the Humane Society of Southern New Mexico and we can help do that or Jamie Jones who is with the other organization that's working on it.

But as kind of an uplift to our sort of the meeting for a change I suppose, I'd like to introduce what we think of as kind of a Christmas present, Jeff Murphy has joined our board and he is already kind of run me around a little bit with new ideas and new energy. He and I were actually supposed to go over yesterday or day before yesterday to Deming and he was going to help me scan dogs and get inventory for that case. We couldn't quite get the legal issues arranged, but I would like to introduce Jeff Murphy.

Gandara: Welcome Mr. Murphy. Thank you for being here.
Murphy: Thank you.
Gandara: And congratulations.
Murphy: Appreciate it thank you very much.
Gandara: Yes.
Murphy: I'm excited to be aboard so we're hopefully going to be able to be a little bit more head-on with the cure to the problem and trying to get it to where
we're not having this many issues. And try and get some more backing so that we can get more assistance, and more public involvement.

Gandara: Yes. Thank you. Really excited to see what you all are.

Bryce: Let me add one other thing. I inherited in a matter of speaking, six cats yesterday into our program. Jeff sent me a note and I wanted him to kind of mention it because this time of year we know there's a lot of happiness in the season, but we also need to keep our mind on what can happen and he's fostering a cat I wanted him to kind of mention so we keep our eye on the ball.

Murphy: Yes, I actually got a call from a person that I know that's a friend of mine. Her and her boyfriend were out on a drive and found a kitten strung up with twine by its back legs hanging from a bucket of a tractor. They cut it down, took it in to the vet. The vet at first said, "You know, I'm not sure that we're going to be able save the leg or not." I don't have any way to show pictures here, but it was pretty mangled. It was pretty swollen up and everything and luckily enough she is a nurse, she sat there and took the time to débride it every day because they told her that because of the restriction from the scarring and the scabbing that was what was going to prevent them from being able to save the leg. She debrided is every day. I took it in last night because she is completely allergic to cats. And did all this care for that cat, including the fact that it wasn't even weaned yet, she was having to bottle-feed and syringe-feed this cat. And I took it in last night and she's a great little kitten. She's on all fours, playful, she loves to, she was actually playing around with me today. I was getting ready to come over here and she'd hide behind the wall and jump out at me. They're great animals. So like you said we kind of need to keep our eye on the ball. There is that out there where people are doing stupid stuff and they're abusing animals and I don't know if it's just out of malice or if it's a situation of they think that's the easiest way to get rid of it.

Gandara: Thank you.

Murphy: Thank you.

Gandara: Thank you for rescuing and for caring for it.

Murphy: Not a problem. Thank you.

Gandara: Any other public comment? Seeing none.

VIII. CHAIR AND BOARD COMMENTS
Gandara: We will move to Chair and Board comments. I'd like to begin and say that this is our Vice-Chair Williams last meeting. I want to extend my heart-felt gratitude for your leadership, your immense knowledge and expertise. I have the utmost respect for what you do and what you continue to do as far as your leadership. Jess I loved working with you and you're going to be sorely missed. Congratulations and best wishes and "Shine On" my friend.

Lastly, but certainly not least, Board Member Garrett. I can't express enough what your leadership has meant to me as Chair of this Board. Your institutional knowledge and experience has been just incredible. Your compassion and thoughtfulness, care and consideration, and you vision especially has been appreciated. I just want to thank you. We sit on many Boards together and I didn't get an opportunity to say that to you at our Coalition, and I just want to say thank you. Thank you for everything that you've done for me and the boards that you sit on and really for this community.

Well happy holidays and I look forward to a great New Year. I think we're going to start off excellent with a presentation from Best Friends and sort of next steps. The supportive services that I know that they're going to provide to the Center and I appreciate everybody in this room and your dedication, so thank you. Vice-Chair Williams.

Williams: Well, first off thank you Madam Chair for those kind remarks. I want to thank Clint and the staff at the Animal Services Center, Bernice and Steve and everybody over there. This has been a good ride and I think we've done important work together and I think that the reason for that is there's a real spirit of teamwork. And I've been privileged to be a part of it for the better part of nine years. When I came on this Board, Toby was two and the little man's 11 now. His breath is a little stinkier, he's a little more cranky in the mornings, but we're still getting everything done that we need to do.

I want to thank my fellow Board members. Serving on this Board with you has been an honor. I've learned much from each of you and I respect and value each of you very, very much.

I want to thank Becky. Becky has, she plays a very silent but important role in making sure that our minutes are kept and that they're accurate.

I want to thank all the animal advocates in the community for the continued work that you do and that for your passion even when we don't see eye-to-eye on some issues, the respect for what you do for the animals never waivers.

Want to thank our Animal Control professionals in both the City and the County. As Board Member Garrett said earlier, "We don't oversee you, but you are part of the team". And the collaborative effort over the last nine years has improved and I'm happy to see that improvement continue.
I'm not going anywhere. Las Cruces is my home and when I retire I'm downloading all these apps on my phone that I can identify bugs and leaves and plants by just taking a picture of them and then it will tell me what they are and I'm going to be wandering around with my granddaughter learning about bugs and plants in Las Cruces so you'll see us out and about in the different parks.

And finally I just want to thank Jean Gilbert and Rick Hahn, they put on a little event Tuesday evening to say thank you to me and Billy and they gave me this little Christmas ornament that looks like a Yorkshire Terrier and the hardest part about owning an animal is when you have to say goodbye and that day will come, but I'll always have this little guy too remind me. Thank you, all of you, for everything. I appreciate it very much. It's been a great opportunity. It's been a learning opportunity and it's been great to be a part of the team. Thank you.

Gandara: Board Member Smith.

Smith: Thank you Madam Chair. You've expressed so beautifully my feelings and I'm sure much of the Board as far as these two gentlemen. I also have to point out that at their departure I become the longest serving member of this Board. Nothing I have really anticipated, but nonetheless they really have each in their own unique and wonderful way set great examples for us. And the advocacy, the passion, the caring, has been intense and has been productive. And so I thank you both very sincerely for your service. And for what I know you're going to continue to do for our community and for this particular community. So thank you very much, thank you Madam Chair.

Gandara: Thank you Board Member Smith. Board Member Garrett.

Garrett: Thank you and thank you for the kind words. It's been a pleasure, it's been a ride. I think it's in reflection my work with this Board and with all of you has probably been the most emotional part of what I've done as a County Commissioner. I just was reflecting on the fact that I've been one of the people who has been a real advocate for data and for plans and for all that sort of stuff. I have not been one of the members of this Board who's been out a lot to the Shelter and that was intentional on my part. I decided to take a particular approach to the work that I saw that was needed here. I don't think that this works for everybody, but it was something that worked for me because quite frankly I get out, I see an animal in need I'm going to start investing all my energy in helping that one animal. And what I saw when I was running for the Commission the first time I actually went out, did a tour, talked to Dr. Beth and I said "This is something that can be made a whole lot better." Not blaming anybody just saying I think this is important work that needs to be done. And I think
the other part was I said "I can't do this personally one animal at a time." I need to be able to use what I can bring to look at the whole picture.

And so as I am preparing to leave, there are a couple of things I just wanted to say. I did a quick count comparing the number of animals euthanized in 2010 which was the year before I came on and then the last data that we had for last year. We have collectively, by comparison with that initial year, saved over 25,000 lives. That's important to know. And I want to emphasize that this was something we did together. Early on it became very clear that there was a lot of confusion about roles relative to the Animal Control Officers, advocacy groups and the Shelter. I think it's appropriate for this Board to be focused on what's happening at that Shelter, but understanding that it is embedded within a public and private environment. And so I'm going to make a suggestion that early in the year, either January or February that one of the things that you do is to consider a resolution to renew the Zero in Seven commitment. This Board made a commitment to Zero in Seven when it was first rolled out. We're getting into the end of it or something like that, but I think the goals are still going to be important. There are different conditions in the community. I think it's going to be important for the Board and the Shelter staff and management to understand what the common goal is. There are certain things that are just, they take on a life of their own. We're going to be dealing with or receiving, benefitting from new facilities. That's good. That's important. That's going to address a number of concerns that have been raised by the community and the Board and that I think was felt by staff and by management. In and of itself that is not going to reduce the number of animals who are killed at the Shelter who otherwise don't need to be killed unless we're able to use that facility in particular ways.

So first request is that you have an updated resolution that you consider. I'm going to suggest that the main reason to do that is to renew, recommit to a goal of a 90% live release rate or higher. That effectively puts us into an operational no-kill realm as a public shelter. Having a common goal is important for an effort like this. And again, I'm talking about this as a whole. I think it's important to look at the strategy with the 12 points and say, where are we on all these different things. I was reflecting on the fact that the number of releases from the Shelter has gone down. At the same time we have increased number of releases that are going on in the field, so you know there's a part of that that's going on and all of that to some degree has to do with how well our microchipping program is going and again program is for everybody.

I want to say the reason, we're data heavy and there are a lot of organizations that would not put up with this, but I would say that if we're serious about reducing unnecessary euthanasia the only way to help everybody understand what's going on is to use data. And so, that's what keeps these meetings out of the realm of simply being reports and anecdotes and complaints, and actually into seeing how our policies are being implemented and whether or not we're getting results. And that's
critical to the purpose of this Board. I will say that the data's important in
the sense that you will, if you measure what matters, you're going to get
people focusing on what matters. And so it's not just about measuring
anything. I would observe that my sense is that we have two primary
areas that need to be really worked on hard. One is public policy and
enforcement relative to the animals that are being picked up, that are
strays, and I think we had a little bit of discussion about that. I think the
real underlying question for me is whether we, as the City and the County,
have put in place ordinances that go beyond public health and safety into
areas that are actually about more social norms than they are about real
safety. And then I think looking at how other communities function and
what their regulations is something that would be worthwhile to check on.

I keep saying I'm not sure that you know it was 137 cats or
something like that, I am not sure how much of a public threat they
represented and yet we ended up killing them and so it's like, "Okay, well
what are we actually accomplishing through collecting animals that
marginally are at risk or pose a risk as opposed to putting them into the
Shelter where they have a higher risk of being killed." We just need to
work through those issues.

The other is spay and neuter. We've known for a long time, we
have got to get the numbers up. I think this is something that's a
combination of public and private and non-profit efforts. But I think in
terms of the target for the public programs that should be run by the
Shelter, we need to be thinking at the right scale, and the right scale is
not, "Oh we've got a 1,000 or 1,500 surgeries done." We need to be
thinking about doing more than a 1,000 a month in order to sustain a
change in the population in the County and the City. We need to get to
that scale. But I'll tell you, as much as that seems like a really big number,
when we started off talking about how do we save more animals the idea
of saving 25,000 lives seemed beyond belief. But we did it by taking small
steps and making improvements every day and working toward our goal of
Zero in Seven. So I just want to encourage you to maintain this, keep the
faith, that's my saying, "Keep the Faith" and continue to do work in a very
civil, collaborative and inspired way.

Something else that struck me and it's like I personally know this, is
that behind every animal issue is a human story and we have to
remember the people. It's not just about animals, it's about people and
animals. And if we keep that and we work together, this is a Board and a
community and an organization that can do great things. I want to thank
you all for the work you've done. There are still significant challenges out
there, but I believe we're in good footing to move forward. Thank you so
much.

Gandara: Thank you so much Board Member Garrett. Board Member Eakman.
Eakman: Thank you Madam Chair. I would like to thank Vice-Chair Williams and Board Member Garrett very much. You've been mentors to me and my journey has been made a lot easier by what you've done. Vice-Chair Williams you've not only been a leader, you've been a peacemaker at times with this group and soothed things down when we had some rough patches. Very much appreciate it.

Commissioner Garrett you're a champion, and you'll continue to be a champion we'll listen to. You're very passionate about your beliefs. You and I, I think have enjoyed sparring from time to time with different opinions on things and I can't help that you're often wrong, but you're never in doubt, it seems, about your positions on those things. It's been very enjoyable. The transition, we're going to depend very much on our management. And Mr. Thacker you are the legacy of Vice-Chair Williams and Board Member Garrett. You are the legacy moving forward. You're what they're leaving behind here as something positive and something that's going to keep things on the positive track. You and Bernice and Steve, you have to accept that mantel. We're going to have a little bit of a learning curve coming up here. If I understand we won't even know which Commissioners come to this Board until the 8th of January and then we meet two days later. And so no time for orientation, no time for anything except showing you where the seat is. So we'll hang on. Board Member Gonzalez, you're going to have to stay with us no matter what okay? But anyway, thank you all so very much. Best of the season.

Gandara: Thank you Board Member Eakman. Board Member Gonzalez.

Gonzalez: I'm so glad to have served with both of these gentlemen. I've had a good education from both of you and you guys are the very best. Because you are the best. And I just want to wish both of you the very best. You are what we consider you being such advocates for this organization. And I think I'll probably see you guys probably out in the audience coming up and giving us some feedback. And I've just enjoyed it guys and I just can say is that you guys are true champions and continue what you've been doing and you're awesome and thank you for me serving with you. God bless you guys. Thank you.

Gandara: Thank you Board Member Gonzalez. Board Member Dollahon.

Dollahon: Billy and Jess I'll say Gods speed and God bless and you've been great to work with and we appreciate having you here. You are part of the legacy that made this all happen. And for the members of the public out there, I will offer to you, you should look to these two gentlemen who set the perfect example for being compassionate about everyone including humans and animals. So thank you for all you've done.

Gandara: Thank you Board Member Dollahon.
VI. ADJOURNMENT (10:47 AM)

Gandara: Okay now we are at adjournment. Can I get a motion to adjourn?

Smith: So moved.

Gandara: Okay. Second?

Eakman: Second.

Gandara: All right, we are adjourned, thank you.

BOARD OF DIRECTORS

Kasandra Gandara, Chairman

Jess C. Williams, Vice Chairperson

Jack Eakman, Board Member

Billy G. Garrett, Board Member

Ramon Gonzalez, Board Member

Gregory Z. Smith, Board Member

ATTEST:

Amanda Lopez Askin, County Clerk
MEMORANDUM

To: Animal Service Center of the Mesilla Valley Board of Supervisors
From: Maria Villa, Accounting Manager
Date: January 9, 2019

Attached are the unaudited financial results of the Animal Service Center operations for the period ending December 31, 2018, below are some observations for your consideration:

• The Statement of Net Position (page 1) shows a cash balance of $408,120 in the General Fund. There are outstanding account receivables in the amount of $88,776, $88,636 from Dona Ana County and $140 from Sunland Park. There are no outstanding accounts payable balances for the month. In addition, the General Fund has $53,142 in outstanding payroll liabilities and a $20,000 PetSmart Grant in Revenues Collected in Advance.

• The Capital Projects Fund also on page 1 shows a cash balance of $705,654. There are no outstanding receivables in the Capital Fund. There are $77,000 in Revenues Collected in Advance for a PetSmart Grant that has not been expended.

• The Statement of Revenues and Expenditures (page 2) shows YTD operating revenues in the General Fund are $1,591,047. YTD operating expenditures are at $1,387,521 which results in an increase in Net Fund Balance of $203,526.

• The Statement of Revenues, Expenditures, and Changes in Fund Balance – Budget to Actual (page 3) indicates 54.6% of budgeted revenues and 46.2% of budgeted expenditures have been recognized. The current budget parameter for this month is 50.0%.

• Repair and maintenance expenditures were at 61.3%, or 11.3% above budget, this was due to the $6,696 vehicle work order repair, and the Warren Construction payment of $10,723 for the demolition and removal of the existing infirmary structure.

• Service expenditures were at 4.7% above the 50.0% budget parameter because of the canine distemper outbreak treatment.
• The Grants and Donations Schedule on page 7 provides a summary of grants and donations received.

* The discrepancy between intake and outcome numbers is due to the number of animals taken in on the final three to five days of the month whose outcome is listed on the following month’s report. (Animals are held as Strays three days without tags and five days with identification for owner reclaim). It is doubtful that the two numbers will ever match.
